Work Experiences

2024 – Lucrative Software Laravel Intern – Backend Developer

Worked on real-world web applications using PHP and Laravel. Collaborated with the development team to build backend APIs. Implemented and styled front-end components using HTML and CSS. Gained practical experience in MVC architecture and database management.

Education

RTMNU University

Bachelor of Commerce in Computer Applications (BCCA)

M.M. Rabbani High School & College

Completed 11th and 12th (Higher Secondary Education)

Achievement

- Developed and deployed a fully functional Laravel-based CRUD module during internship.
- Enhanced page load performance by optimizing SQL queries and minimizing redundant code.
- Successfully debugged and resolved real-time backend issues during project development.
- Received positive feedback from team leads for code quality and collaboration skills.
